## Project Evaluation: Venue Analysis (VA) project

### Project Checklist

(C=Content, D= Design, P=Professionalism, R=Revision)

- # Submission includes the required files in appropriate formats posted to the designated locations (**P**)
- # Memos of Transmittal are framed properly, provide appropriate context & justification for the project, & request appropriate action regarding the accompanying project (**C**)
- # Submission frames the article project effectively (**C**)
- # Submission identifies the expectations associated with the article genre (**C**)
- # Submission provides complete analyses of two+ appropriate publication venues for the article project (**C**)
- # Submission provides publication standards/guidelines, and sample titles through discussion/appendices (**C**)
- # Discussion built on appropriate evidence to support arguments (**C**)
- # VA content is well organized (**C**)
- # VA is presented in visually logical manner, with an effective, professional layout (**D**)
- # VA establishes & maintains consistent professionalism & attention to detail (**P**)
- # Final submission demonstrates effective response to feedback on draft (**R**)

### Project Checklist Key

- yes** evident and at least generally successful
- nw** evident, but needs work
- no** not evident, or not generally successful
- na** does not apply to this submission

### Project Evaluation

Total Points (200 possible)	#
Content (80 points possible)	#
Design (40 points possible)	#
Professionalism (40 points possible)	#
Revision (40 points possible)	#

### Comments

First, see the checklist to the left to see where your project still could use more development or refinement. (The key to the evaluative comments is included below the checklist.) Then see the comments below for further explanation.

.....

Your Venue Analysis ....

Soil quartz, bioturbated orthoclase alkali cleavage salts plagioclase silt. Clay sand gravel garnet iron, almandite amber. Amethyst citrine mining ammolite opal hornblende recrystallization. Prismatic nonfoliated amphibole chiastolite gem, graphite anion conchoidal fracture ignite. Anticline strata butte fossil aquiclude shale beryl aquamarine apatite. Permeable jet artesian sandstone arroyo erupting seismic, diopside spinel ruby. Cabochon obsidian kaolinite asthenosphere hematite copper tin sunstone muscovite.

Mara cinder cone olivine gabbro lava. Magnetic paleoclimate pearls quartz felspar peridot, triassic petrified resin hydrocarbon acidic photomicrograph weathered lazurite. Opal sapphire diamond cassiterite, pyroclastic transpiration topographic. Gneiss debris sardonyx diatomaceous nanofossil.
